MK Architecture: Crafting Timeless Designs for Modern Living

[About Us](#) →

Crafting Timeless Designs for Modern Living

[About Us](#) →

CREATIVITY | HUMANITY | PURPOSE

Our Philosophy

At MK Architecture, we believe that the smallest detail should have a meaning or serve a purpose, Design impacts all our lives in ways subtle and overt, great design is more than simply good aesthetics, It is the way we use objects.

We value design as a tool to influence the way people use space, by creating atmospheres that are accessible and adaptable provoking inspiration and connection.

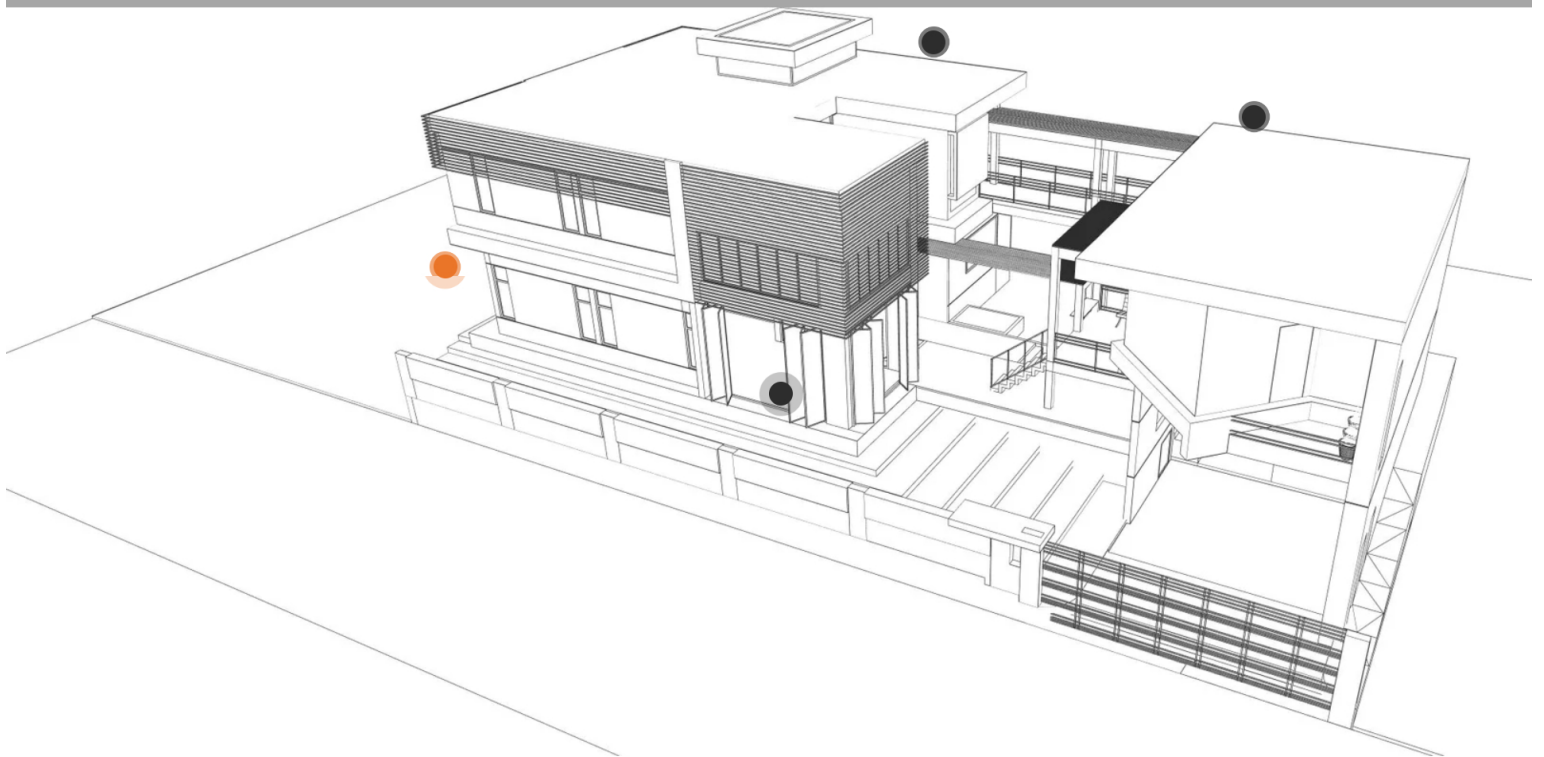

We strive to promote relationships spatially and interpersonally enhancing the performance of the build environment and its inhabitants. Each design should be a one of a kind, effectively communicating one's passion toward a solved problem for the end user and the industry. Additionally, integrating various resources to create spaces that are environmentally and economically

sustainable is of extreme importance.

We look to design elements such as balance, form, emphasis, texture, and color to inspire unity in our work.

MK ARCHITECTURES

MK Architectures is led by a principal who holds a master's degree in architecture from the City College of New York. With over twenty years of professional experience, the firm's passion lies in leveraging design and problem-solving to create functional buildings and sites. These spaces are envisioned to be connected, engaging, comfortable, and safe, all while employing innovative methods in design and construction. MK Architectures is

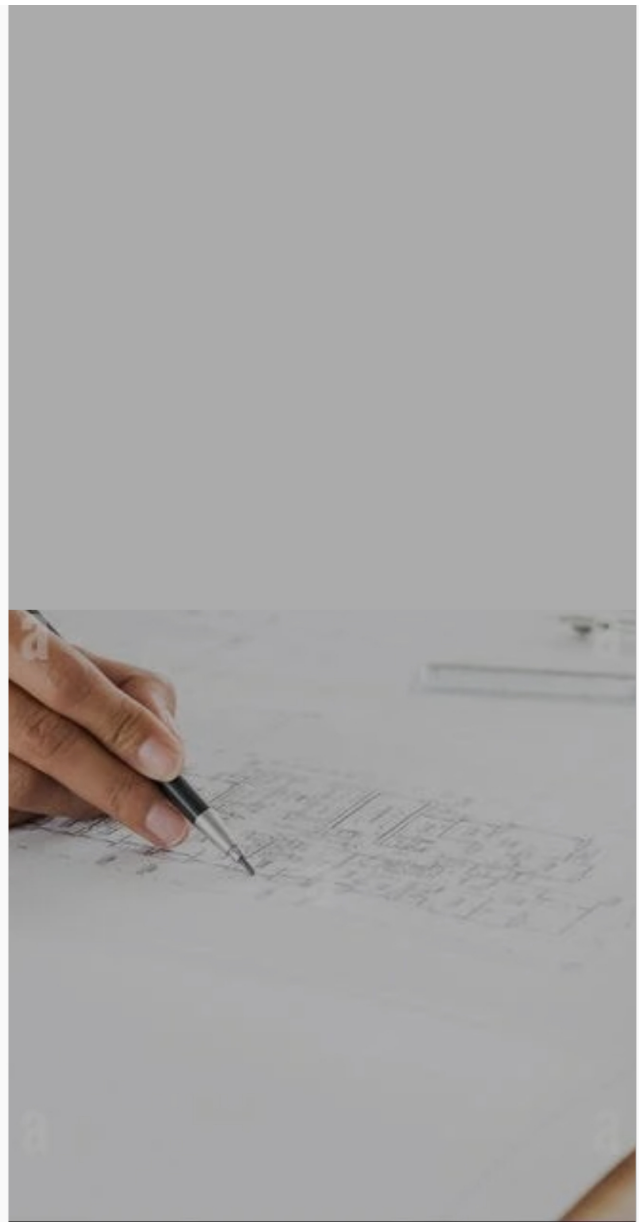

methods in design and construction. MK Architectures is committed to collaborating closely with clients to deliver innovative, integrated design solutions, always striving to build on sustainability within project budgets and limitations.

The firm's principal has contributed to high-profile and large-scale projects across the United States and internationally. These include significant undertakings such as LaGuardia Airport, the MoMA Tower in NY, the Rutgers Cancer Institute (CINJ), and the NJ University Hospital, gained through experience at some of the most esteemed architectural firms, including SOM, HOK, and Perkins Eastman. MK Architectures applies extensive knowledge and experience in construction technology, sustainability, building materials, equipment, and mathematics to fulfill responsibilities related to client interface, project document delivery, and construction administration.

MK Architectures vigorously addresses the challenge of ensuring sustainable solutions and maximizing the potential of emerging digital technologies. The firm actively engages in the exchange of ideas and fosters collaboration with consultants from all fields to achieve optimal project outcomes.

The principal of MK Architectures is a registered Architect in New York and New Jersey States and holds memberships with several prominent organizations. These include the American Institute of Architects (AIA), the Healthcare Facilities Management Society of NJ (HFMSNJ), Evidence-Based Design Accreditation and Certification (EDAC), the USGBC (US Green Building Council), the Architectural League of New Jersey, and the NCARB (National Council of Architectural Registration Board).
